This programmer can be mounted in the following ways: 1. Directly wall mounted  2. Mounted to a recessed conduit box

**CAUTION!**

- Installation and connection should only be carried out by a qualified person and in accordance with national wiring regulations.

- Before commencing any work on the electrical connections, you must first disconnect the programmer from the mains. None of the 230V connections must be live until the installation has been completed and the housing is closed. Only qualified electricians or authorised service staff are permitted to open the programmer. Disconnect from mains supply in the event of any damage to any buttons.

- There are parts that carry mains voltage behind the cover. The programmer must not be left unsupervised when open. (Prevent non-specialists and especially children from gaining access to it.)

- If the programmer is used in a way not specified by the manufacturer, its safety may be impaired.

- Prior to setting the timeswitch, it is necessary to complete all required settings described in this section.

- Never remove this product from the electrical baseplate. Do not use sharp tools to push any button.

---

This 2 zone programmer is designed to provide ON/OFF control for one hot water and one heating zone.

1. Factory default settings

- Contacts: 230 Volt contacts
- Program: 5/2D
- Backlight: On
- Keypad: Unlocked
- Clock type: 24 Hr Clock
- Day-Light Saving

2. Specifications & wiring

- Power Supply: 230 Vac, 50-60 Hz, 8 VA
- Ambient Temp: 0~35°C
- Contact Rating: 250 Vac 3(1)A
- Program Memory backup: 3 months
- Battery: 3Vdc CR 2032
- Backlight: Blue
- IP rating: IP20
- Backplate: British System Standard
- Pollution degree 2: Resistance to voltage surge 2000V as per EN 60730
- Automatic Action: Type 1.5
- Software: Class A
